*Real Time Fleet
Monitoring and
Analytics*

Netcent Systems Pvt. Ltd.
Neo Corporate Plaza
Near Kapolwadi
Ramchandra Lane Extension
Malad West
Mumbai - 400064

How it works

A device with GPS and Wireless communication capabilities is installed on your vehicle. It keeps our servers updated about the location of your vehicle. The server maintains a record of these updates. At any point of time you can log into our portal to access this data in form of maps, charts and analytical reports

Apart from location you can also monitor the speed and optionally temperature, humidity, atmospheric pressure etc. in real time. The system can be configured to look out for certain events like over speeding, vehicle start, stop, etc. and alert you via email or SMS

Live Fleet

Live Fleet tracking lets you see your entire fleet on the map in real time.

- Snapshot view of all vehicles' location
- Route travelled by each vehicle
- Speed and Heading
- Locations update every 10~15 seconds
- Locate vehicle with an accuracy of 5~10 meters

Real Time Alerts

With real time alerts you choose to be instantly notified about events such as

- Vehicle Start or Stop
- Excessive Idling
- Over speeding
- Towing
- Device Tampering
- Vehicle entering or exiting a specified area

Other Features

- Geo Fencing
- Customizable Points of Interest
- Easy to use well designed user interface

Benefits

- See the current status of your entire fleet at a glance
- Get instant alerts on important events
- Perform historic drill down on vehicle activity
- End reliance on driver provided information
- Improve ETA estimation
- Get robust metrics about your fleet
- Identify bottlenecks in you operations

Management Reports

Active Fleets maintains a detailed log of vehicle activity made up of millions of data points. With advanced analytics, we tap this raw data to generate reports that give you useful information in form of intuitive reports

- Stops Taken
- Distance Covered
- Places Visited
- Active and Idle Time
- Over speeding
- ...and more

Future proof your investment with standards based technology

Existing & future IT systems in your organisation can make use the data collected by Active Fleets using standard machine-2-machine data access techniques.

Your investment is not in a closed, standalone appliance but in a system with all the plugs and sockets in place which would allow it to be seamlessly integrated into your IT infrastructure.

Pricing

The cost has two components: one time cost of the device installed in each vehicle and a subscription fee for using the service – online access and SMS Alerts.
